- *hairpearl tint **ppd-free** or regular (Deep Black or Blue Black)*
- *hairpearl Cream Developer Oxidant*
- *Biosmetics Tinting Brush – round tip*
- *hairpearl Tint remover*

PREPARATION

The treatment time varies depending on the individual client's lashes. Please note that the larger pads offer a softer more natural curl where a small pad will provide a more dramatic curl.

- **Please, gently massage the sachets before opening!**
- Choose the appropriate *Biosmetics* Silicone Pads (**S**mall, **M**edium or **L**arge), trimming to fit as required.
- Complete client data record and make sure that client is not wearing contact lenses.
- Position client comfortably, have her or him lie down, offer a cozy blanket.
- Protect client's hair with a hairband and drape a towel or bed roll over the client's upper body to protect clothing and sanitize your hands.
- Take a "Before" photograph of client.

PROCEDURE – STEP BY STEP

- **Cleanse brows with *hairpearl* Lash and Brow Shampoo Foam.**
- Ask your client to look upwards to **place an *Biosmetics* Aloe Eye Gel Patch under each eye** ensuring clients bottom lashes are secured under them while the upper lashes rest on the silicone pad.

The self-adhesive *Biosmetics* Aloe Eye Gel Patch is designed to protect the sensitive lower lid area during lash tinting and lifting treatments. The extra thin patches are lint free, smooth and easy to work with.

Inform your client that her/his eyes need to be closed as from now and comb through the lashes using a *Biosmetics* Disposable Mascara Wand, put the mascara wand to the side for later.

- Apply a few drops of *Biosmetics* Lash and Brow Bond to the back of the *Biosmetics* Silicone pads and place them in position on the eyelids very close to the root. Hold in place for about 20 seconds until the pads adhere to the lids.

Now, begin at the outer corner of the eyelid applying the Lash Bonder on the pad in small sections and **lift the lashes carefully by using the *Biosmetics* Y-Brush, (very smooth) tighten them from the root onto the Bonder resp. the Silicone Pads.**

The *Biosmetics* Eyelash Separating Tool will help you to separate and to tauten the lashes carefully onto the Pad. Hold the lashes in place until they stick. Step by step, section by section and lash by lash

ensuring not to cross the lashes. Gradually move along the pad **until all lashes are bonded on the silicone pad.**

In this step a speedy and concentrated work with great precision and diligence is of crucial importance for the lifting result!

APPLICATION OF *BIOSMETICS* CREAM No 1 – Waving Lotion

- Please knead the sachet with Waving Lotion (Cream No 1) before opening and then press the waving lotion into the *hairpearl* Porcelain Dual Mixing Dish.

Apply a small amount of the waving cream from root to the centre of the lashes (to 1/3 up the lash) by using a *Biosmetics* Microbrush.

Please work with great precision and ensure NOT to soak the whole lash from root to the tip.

Please keep in mind that the Waving Lotion needs to be applied as close as possible to the lash roots of the upper lash/water line without dripping into clients` eyes. Use lotion sparingly.

Processing time – Waving Lotion:

Very fine lashes:	4-5 minutes
Fine or tinted lashes:	5-6 minutes
Natural healthy lashes:	6-8 minutes
Course healthy lashes:	9-10 minutes

- Remove waving lotion by using a *Biosmetics* Lash Wiper (These lotion wiping brushes are designed to wipe off the lifting Lotions Cream No 1 and No 2 with a gentle twist-pull motion.)

- Give the lashes a gentle brush with the Lash Wipers, - carefully not to wet the lash tips, continue procedure until all lashes are dry and clean. **Do NOT use any water or linty applicators!**

Advice from our Experts:

In case single (baby) lashes peel off from the Silicone Pads use a 3M Tape to leave them in place. If needed, use some Lash Bond to put them in correct position, again.

APPLICATION OF *BIOSMETICS* CREAM No 2 – NEUTRALIZER

- Please knead and open sachet No 2 with Neutralizer Cream. Press the neutralizer into the clean part or the *hairpearl* Porcelain Dual Dish.
- Then apply a small amount of the Neutralizer on clients` lashes again, from root to the centre of the lashes (**exact the same place where the Waving Lotion was applied to**) by using a new Microbrush.

<u>Processing time – Neutralizer Lotion:</u>	
Very fine ant tinted lashes:	5 minutes
Natural healthy and course healthy lashes:	6 minutes

- **Remove Neutralizer Lotion** by using a *Biosmetics* Lash Wiper, comb the lashes with a gentle twist-pull motion.
Again, do not use any water or linty applicators!

RECOMMENDED COLOUR BOOST:

If desired, please tint the lashes at this point of treatment:

- **Prepare desired *hairpearl* Tint** (Blue Black or Deep Black) and apply by using the *Biosmetics* Tinting Brush with round tip.
Do not forget to tint the lashes of the lower eyelid. A Microbrush will help you to release these fine lashes held down by the Eye Gel Patch.
- **Remove the tint after 3-5 minutes** using a new Lash Wiper.

APPLICATION OF *BIOSMETICS* CREAM NO 3 – CONDITIONING FOOD LOTION AND THE *BIOSMETICS* MOIST PEN

- Please open sachet No 3 and **apply *Biosmetics* Moisturising and Conditioning Lash Food Lotion on the lashes, gently releasing the lashes from the Silicone Pad.** If needed, use a new Microbrush.
- Apply a little bit of Cream No 3 to the eyelid under the Silicone Lash Pads using a new Microbrush, gently **releasing the Pads from the eye lid.**
- Remove the *Biosmetics Aloe Eye Gel Patches* (if you haven't already done so) and comb lashes **up** using a new Mascara Wand.
- **Explain important aftercare (see next page) to client and give him/her a printed copy to take away along with the *Biosmetics* Lash n Brow Moist Pen.**

AFTERCARE:

The aftercare advice is given to ensure fully understand what should and should not be done 24 - 48 hours post treatment for longevity of the *Biosmetics* and *hairpearl* Lash Lifting results.

- Keep brows dry for 24 - 48 hours!
- Use the *Biosmetics* **Lash n Brow Moist Pen** twice a day and **comb the lashes upwards only!**
- Do not apply any make-up or receive any other eye treatment for least 24 - 48 hours after your treatment.
- Avoid rubbing the brows.
- Avoid swimming/sauna/sweating for 24 - 48 hours.
- If any stinging or swelling occurs, keep applying a cold dampened cotton pad or cold compress. If it persists seek medical advice!

If the aftercare guidelines are followed with utmost care the *hairpearl* & *Biosmetics* Brow Lamination results can last 4 - 6 weeks.
